

“THE COMBINATION OF DESIGN HERITAGE, TECHNOLOGY, FAULTLESS MANAGEMENT AND IMMACULATE CREW WORK MAKES LEOPARD MORE THAN WORTHY OF HER REPUTATION.”

Leopard is arguably the most high profile racer cruiser yacht in existence. This speed machine has a history for trophy-hunting and record-breaking around the world and represents a pinnacle in the evolutionary timeline of super maxi development. She is an entirely new species of big boat: a 100-foot yacht that undergoes a stunning metamorphosis between a potent racing machine and a 5* luxury, crewed charter yacht.

The concept behind Leopard was to create a yacht with a radical dual purpose: high performance for racing with a canting keel and twin dagger boards, combined with startling internal volume, accessories and creature comforts to meet the demands of the top-end charter market. The designers excelled in their task and Leopard was launched as the first ever super maxi yacht with this dual role in June 2007.

Whilst in full racing mode, Leopard's spacious saloon may be waist deep in bagged headsails and foul weather gear however within 24 hours she can be transformed and be ready to receive both corporate and private guests.

Once on board, the size of the external deck areas and overall internal space provided by the 6.8metre beam are quite breathtaking. The saloon's impressive height and width provide a luxurious alternative to the deck areas where guests can enjoy the five-star hospitality provided on board.

"THE CONCEPT BEHIND LEOPARD WAS TO CREATE A REALLY RADICAL BOAT WITH A DUAL PURPOSE – HIGH PERFORMANCE FOR RACING COMBINED WITH ENOUGH INTERNAL VOLUME AND CREATURE COMFORTS TO MEET THE DEMANDS OF THE CORPORATE CHARTER MARKET"
MIKE SLADE, OWNER

SPEED ESSENTIALS

KEEL

Leopard's keel is capable of canting in 12 seconds and has four power options.

High-speed canting power is generated by the main engine, the auxiliary engine cants slower and electrical and manual canting are slower still.

Pivoting around a pin attached to stainless plates mounted on strong monolithic carbon bulkheads, leverage is supplied by two stainless hydraulic rams rated to 80 tonnes.

DAGGERBOARDS

Leopard combines a canting keel with twin daggerboards and twin rudders. The hydraulically powered daggerboards can withstand around 100 tonnes of load, drop one metre below deck level and stand two metres above the deck when raised.

PLC

The PLC (Programme Logic Control) runs and monitors every system on board and is the technological heart and brains of Leopard. Located forward of the chart table and under an expanse of carbon that doubles as a crew table, the PLC can be pre-programmed to run the boat in 'automatic'. At the push of a button, the computer can tack the boat, controlling the helm, mainsheet, traveller, optimal angle of keel cant and daggerboard deployment. Effectively, the entire yacht can be controlled remotely from a modem at the base in Sydney.

Leopard's interior is fitted out in an ultra light, airy and modern idiom.

Broad companionway carbon steps lead down to the spacious saloon. Elegant yet modern, the saloon is filled with home comforts and comfortably seats 12. There is a large dining table to port surrounded by ample seating in appealing rich fabrics. In-house entertainment comes via the latest in flat-screen TV, DVD and Audio equipment.

Aft of the saloon, the crew area is on a slightly lower level and has a separate companionway leading to the rear of the cockpit and a well equipped galley. Just forward of the chart table, an expanse of carbon provides a dining table for the crew but remove this cover and the yacht's brain – the Programme Logic Control (PLC) – is laid bare. This vast computer controls Leopard's 132 hydraulic functions: an astonishing mass of neatly ordered wiring and galaxy of winking lights that prompt a high level of respect from the onlooker and recognition of the PLC's latent power.

The interior throughout illustrates the interior designer's art of wrapping technology into an exceptionally attractive and yet highly functional cocoon. A design which successfully conceals the twin dagger board casings – large, carbon fibre trunks fed by a root system of hydraulic hoses just above floor level. This entire system is capable of raising and lowering the dagger boards under immense loads within seconds ensuring that Leopard is highly responsive for her weight and size.

Forward of the saloon the luxury guest accommodation can be found which can accommodate up to 8 guests. This comprises of a master ensuite cabin, two further double ensuite cabins and two single pullman cabins perfect for families or a group of friends whilst cruising the warmer waters of the Mediterranean or the Caribbean.

"LEOPARD IS ONE OF THE FASTEST
CHARTER YACHTS IN THE WORLD TODAY."
CHRIS SHERLOCK, CAPTAIN

BREATH TAKING BOAT, FANTASTIC CREW AND
IMPECCABLE SERVICE.

THE MOST EXHILARATING AND MEMORABLE
ENTERTAINMENT DAY I HAVE EVER ATTENDED.

THE RESPONSE FROM OUR GUESTS THIS
MORNING HAS BEEN QUITE INCREDIBLE.

THE BOAT SPEAKS FOR ITSELF BUT WHAT IS
EQUALLY IMPRESSIVE IS THE WAY THE DAY
WAS SO PROFESSIONALLY HANDLED.

UK DAY CHARTERS

Leopard is available for top level corporate day charters from Southampton during the UK summer. Up to 20 guests gather on board at 10.00 for a champagne breakfast and a safety briefing from the skipper. Once the formalities are over the mooring lines are cast and Leopard's crew skilfully begin to prepare the yacht for sailing.

Refreshments and canapés are offered by a friendly stewardess as the yacht sails down Southampton Water and out towards the Solent. It's here that Leopard can really stretch her legs and the fun begins.

Guests have the exhilarating opportunity to help helm and sail the yacht and her captain will give a full tour of her capabilities. Guests also have a customised, 8 metre, high-powered Cougar RIB plus a qualified driver at their disposal allowing those who have opted for lunch ashore to be transferred to a waterside seafood restaurant in style. A party preferring to dine on board enjoy an exceptional three-course buffet lunch.

Sailing continues at 14:30 for the rest of the afternoon, with a break for Pimms and a traditional cream tea before finally heading back to the Marina by 17.00.

The yacht costs £10,000 (plus VAT) per day to charter or £12,500 (plus VAT) during Cowes Week. This figure is fully inclusive for 20 guests.

Champagne, fine wines, beers, soft drinks, tea and coffee are available throughout the day.

INVITATION CARDS & BESPOKE MAPS

Host charterers will receive bespoke corporate invitation cards and berth maps with written directions to send to their chosen guests (these can also be supplied by email on request).

CORPORATE CLIENT TESTIMONIALS

We have chartered Leopard and her predecessors Leopard of London & Ocean Leopard for many years now and every year surpasses the last.

This is the ultimate once in a lifetime experience.

Leopard provides both novices and sailors the opportunity to feel the thrill of a high performance racer combined with the indulgence of an exclusive charter yacht.

The crew were professional and courteous and the charter was of an excellent standard.

The Captain exudes skill and ability at the helm and his personality is a big part of the package.

The slickest corporate entertainment operation that I have ever experienced.

CHARTER RATE

The fully inclusive cost to charter Leopard is £10,000 plus VAT per day or £12,500 plus VAT during Cowes Week. Each charter is for up to 20 guests and includes a professional crew, catering & refreshments, exclusive use of Leopard's private tender plus all other boat related costs.
